

# **Kosar University of Bojnord at a Glance**

Kosar University of Bojnord as a female academic education icon, is established by emphasizing on honoring the high status of women, the principles of entrepreneurship, and women's employment and education, as a true mission. This university benefits from advantages such as the only female university in northeast of the country after Al-Zahra and the second female university of the country.

It is the first females' comprehensive university in the northeast of the country and the first females' special university after the glorious Islamic Revolution.

Kosar University, located in Bojnord, the capital city of North Khorasan Province, was established in 2012, starting its mission by admitting students to start in seven graduate programs. The University instituted its Faculty of Basic Sciences, Faculty of Humanities, and Faculty of Engineering Sciences in the same year and admitted 176 women students to proceed for their bachelor's degrees. Currently, the university has about 67 faculty members, more than 3500 students and 21 undergraduate and graduate programs is to serve the academic community. Kosar University of Bojnord by applying high profile faculty members is capable in various domains and could have great achievements in many fields of science, research, culture and sports only in six years. The present organizational structure of the university is formed of Presidency, Vice Chancellorship for Education and Research, Vice Chancellorship for students' Affairs, Vice Chancellorship for Administrative and Financial Affairs. The University has plans for further academic, research and cultural expansion and the cause promises new, well-to-be developed prospects.

---

## Vision

- Two industrial projects of Kosar University of Bojnood among the top-selected projects by the Ministry of Science, Research and Technology (2021,2022)
- Awarded the first two ranks in the productivity indicators in the ISC report (2021)
- Awarded the title of top researcher elite in North Khorasan Province by a faculty member of the Mathematics Department

## About Student Life

Kosar University of Bojnord is located 12 km (10 minutes drive) southwest of Bojnord City. KUB occupies 100 hectares of land and the main campus includes all educational or research buildings. KUB also offers sports and recreation centers in order to facilitate students and staff. The green space around the campus and the quiet environment make life at KUB pleasant for students and staff

# About Student Life

## Food

The nutrition unit is responsible for preparing, cooking and distributing student's food for lunch and dinner meals using quality and hygienic raw materials in order to provide part of the student's living needs. Booking and distribution of food in restaurants is done through the food automation system.

## Sports Complex

To achieve the goal of encouraging and motivating students to participate in physical education activities the university's sports space has an area of 2,460 square meters. The activities of the office are 1) education: offering physical education courses 2) extracurricular activities and 3) research activities: evaluation and examination of the physical condition of students and doing the related tests.

## About Student Life

### ↓ Counselling Center

This center aims at improving mental hygiene of students by offering consultation and psychotherapy to students. This center is one of the most successful centers of its kind among Iran's universities

### ↓ Amphitheater

The amphitheater and meeting hall of Kosar University, Andishe hall, with seating capacity of 350 is a well-equipped hall situated just next to Faculties buildings. It is mainly used for holding the education meetings and gathering, cultural celebrations and events.

# About Student Life

## └ Societies and Clubs

KUB is not just about going to classes and taking courses. It has never been like this. KUB is a community that, in addition to majors and courses, engages students in what they are interested in. There are many communities and clubs to attract different students with different majors and they can progress in any field.

## Central Library

The Central Library and study hall with the theses/dissertations section, provides a variety of study spaces. It has more than 24,000 printed books and more than 750 reference books.

# About Student Life

## The Central Laboratory

The Central Laboratory supports the faculty, researchers, and students of the University and other institutes of the country. Having various specialty laboratories has always been providing modern and high-tech equipment in a wide range of engineering and basic sciences for all researchers. This center provides valuable services for the scientific growth and development of the University through laboratory services and professional consultations provided by our competent experts

# About Student Life

## └ Dormitory

In KUB, there is a main residence complex available for students. Students, both undergrad and graduate, reside in the ‘Rezvan’ residence hall which is situated next to the main campus, only 500 meters walk from Faculties. The engaging atmosphere of the dormitory, as well as the pleasant landscape, offers an apt opportunity for students to enjoy an environment far from the madding crowd of the city!

## └ Skills training and career counseling management center

Skills training and career counseling management center (TMC) was established with the aim of empowering students. The aforementioned goals are based on three main processes: assessing the skills needed, providing career and educational counseling services, and ultimately providing students and graduates with the skills needed by the labor market.

# About Student Life

## Women's Innovation Center

This center aims to support creative women and strives to strengthen the role of female innovators and entrepreneurs. By attracting, organizing, managing, and synergizing accelerators, startups, technology, and knowledge-based companies active in areas related to women, it can play a key role in empowering and developing women's culture and economy.

## Communications with industries and Entrepreneurship

Considering the role of academics in the development of societies and the role of universities and research institutes in this matter, as well as the necessity of their relationship with industries and executive bodies, this relationship has become more prominent in recent years than in the past, and following this, important contracts have been concluded in this regard.

The improvement of the university's relationship with government and industrial centers at national and provincial levels and development, strengthening and guidance of applied research in order to meet the needs of the country's industry and society are main goals of this office and 11 memorandums of understanding have been signed and 7 Extracurricular research projects have been carried out. Also, University provides 12 study opportunities in industry and society for its faculty members.

4- Kosar University achieves top ranking in the field of public sports
